

COVID-19 Vaccine Drug Reactions: Child Female Reproductive Disorders

Preliminary Notes – Reactions Listings Start on Page 2 Below

1. Child Female Reproductive Disorder cases Reported through June 4, 2021 in the United States to the Vaccine Adverse Event Reporting System (VAERS). Please keep in mind that the mRNA vaccine drugs accumulate in significant amounts in the ovaries.
2. In the United States, it is very rare for children to be given COVID-19 vaccine drugs. As children are tested with experimental drugs, there may be a significant increase in child seizures and convulsions.
3. In February and early March, 2021, there were articles published related to the large number of deaths linked to COVID-19 vaccine drugs, including pieces by Reuters and International Business Times. Shortly after these publications, there appeared a small number of *fake cases* submitted in order to try to discredit VAERS. This included a death of a 2-year-old child. Submitting a false case to VAERS is against U.S. federal law. Fake cases only benefit the drug manufacturers and do not benefit people who experience serious short-term reactions such as death and blood clots or reactions from long-term, repeated injections.

1373139	6/4/2021	CO	17	F	4/24/2021	5/21/2021	Daughters has missed her period main event the COVID shot. She is very regular so this is not a normal reaction/event. Will wait a few more weeks and if it still has not come we will make a doctors appointment.
1367931	6/2/2021	NC	17	F	4/17/2021	4/17/2021	2 hrs after vaccine started having chills and fever by Thursday April 22 her legs starting hurting pain moved from toes and all the way up to back then it stated moving to her hands and fingers. got admitted to hospital because they wanted to make sure she wasn't having syptoms of MS they did blood work, MRI, covid test, xrays, lupus test, physical therapy, nerves test, lime disease test and everything came back fine by sunday they sent her home and she started having stomach pains and had to go back to Dr. she has experience hair loss and it started her menstrual cycle early. was having alot of fatigue and its's been a month and she is now finally started to feel a little better but Dr dont know how long it will be before she is fully herself
1366857	6/2/2021	VA	17	F	5/29/2021	6/2/2021	Got period 2 weeks early days after vaccine that?s heavier than normal
1364754	6/1/2021	WA	17	M	5/25/2021	5/26/2021	Critical thrombocythemia, causing anemia due to nose bleeding, GI bleeding and metrorrhagia. Elevated WBC. Acute kidney failure. Pancreatitis. Admitted with Dx of Tumor lysis syndrome required blood and platelets transfusion
1364517	6/1/2021	NJ	15	F	5/26/2021	5/26/2021	My daughter had started her menstrual cycle a day or two prior to receiving the vaccine. She has had her cycle since August 2020. Her bleeding became VERY heavy after receiving the shot, where she was bleeding through super plus and ultra tampons in just a couple of hours. She is still bleeding like this 6 days later. It has not stopped. Her regular periods are quite lite and nothing like this.

1362397	5/31/2021	MD	17	F	5/28/2021	5/30/2021	Site: Pain at Injection Site-Mild, Systemic: menstrual changes-Mild, Additional Details: headaches, no appetite, stomach ache, light sensitivity, fatigue, menstrual cycle disrupted. Patient states she got her period 2 weeks early. She takes an oral contraceptive pill, she did not miss any
1355094	5/27/2021	TX	17	F	3/6/2021	4/1/2021	Increased menstrual cycle, had mostly stopped for every 3 months. Now is every 2 weeks and is back to where it was and worse before I was put on birth control. Includes severe menstrual pain.
1354553	5/27/2021		13	F	5/1/2021	5/24/2021	Menstrual cycle has been delayed after receiving first dose. It was on clock work before that. Still monitoring.
1352354	5/26/2021	NJ	15	F	5/25/2021	5/26/2021	Driving her to school this morning, she had a grand mal seizure for a little more than a minute...a couple hours until back to communicating. She's recovering perfectly as usual. She has them occasionally (every few months) but normally driven by her menstrual cycle which is not coming up and made this uncommon. I just wanted to report it so you have the information. It could be in the birth defect category below, but I'm not a doctor so not sure and selected none of the above.
1350909	5/26/2021	CA	13	F	5/14/2021	5/24/2021	menstrual spotting 2 weeks before period expected
1350369	5/26/2021	NC	15	F	5/22/2021	5/24/2021	Site: Bruising at Injection Site-Mild, Systemic: Patient developed Left side mastitis after receiving vaccine-Severe, Systemic: Lymph Node Swelling-Severe, Additional Details: Pt developed left side mastitis according to her doctor and pt had gotten the COVID vaccine in the left arm just 2 days prior. Pt is only 15 and there is no other origin possible according to her dr.
1345403	5/24/2021	TX	15	F	5/22/2021	5/22/2021	extremely heavy and painful period
1342182	5/23/2021	IA	15	F	5/21/2021	5/23/2021	Menstral-type bleeding out of cycle
1341259	5/22/2021	VA	16	F	4/22/2021	5/1/2021	i skipped my period, my period is usually very regular and i missed an entire cycle. currently having a very intense, heavy, and cramp filled period which is irregular
1340686	5/22/2021	CT	13	F	5/14/2021	5/19/2021	Heavy period started 3 weeks ahead of anticipated.

1337441	5/21/2021	CA	17	F	3/29/2021	4/27/2021	Developed nausea, vomiting, abdominal pain and early heavy menstrual bleeding. Previously on oral contraceptive with normal periods. Got period a week earlier (while still taking oral contraceptives) and had a much heavier period. Had nausea and vomiting that awakened her from sleep the morning preceding the bleeding started.
1330329	5/19/2021	FL	17	F	5/13/2021	5/14/2021	- Pain/tenderness at injection sight for ~72hrs after vaccination -Small red bump (size of quart) at injection site(was gone after 72hrs.) ***- Abnormal vaginal bleeding, heavy bleeding occurred, o clots within blood, cramping*** - General malaise
1323903	5/17/2021	MI	16	F	5/13/2021	5/14/2021	Patient presented to the ED with dizziness, fever and heavy vaginal bleeding around 24 hours after receiving her first dose of the Pfizer-BioNTech COVID-19 vaccine. She was tested for active COVID-29 infection via nasal swab PCR and tested positive. Upon presentation labs were drawn and her platelet count was found to be 8 on 5/15. Repeat labs were drawn that day to confirm low platelet count and confirmed diagnosis and thrombocytopenia secondary to an immune reaction to the vaccine was suspected. She was admitted and was started on tranexamic acid, medroxyprogesterone, dexamethasone and IV immunoglobulin (Ig) to help treat low platelet count and vaginal bleeding. As of writing, she is still admitted and her most recent platelet count on 5/17 was 16.
1323911	5/17/2021	OH	14	F	5/13/2021	5/14/2021	Heavy period with 4 days of cramps
1313625	5/13/2021	PA	16	F	4/21/2021	4/28/2021	Sore arm with rash/swelling at injection site, lasted a week. Fever and chills that evening through the night. Extreme fatigue, slept for 18 hours. Abnormal menstruation (spotting for 8 days prior to actual period, started 2 days after vaccine)
1312444	5/12/2021	ID	17	F	4/7/2021	4/16/2021	Patient began her menstrual cycle on normal schedule April 16th 2021. The flow was much lighter than normal in the beginning then after a few days it was normal flow. Her periods have always been 4 to 7 days long. Her period has been ongoing since 4/16/21 and has fluctuated in flow.

1291887	5/6/2021	NY	16	F	5/1/2021	5/6/2021	Unable to fall asleep normally. First two night she was awake 5 hours later than usual. Now still having trouble falling asleep but only a few hours past when she would normally fall asleep. Her normal period ended on April 26th, she received her second shot on May 1st her period came back again on May 6th unexpectedly. Instead of just blood flow it seems to be tissue?? in the mix as well and heavier than usual.
1283184	5/3/2021	RI	17	F	4/24/2021	4/28/2021	My daughter has the Nexplanon arm implant to address her irregular menstrual periods and for the past two years has basically not had a menstrual period. Approximately 3-4 days after receiving the first dose of the Pfizer vaccine, she started a very heavy menstrual period and is still experiencing it. It is precisely the type of menstrual bleeding that resulted in the Nexplanon being prescribed.
1282856	5/3/2021	CA	17	F	4/1/2021	4/2/2021	The day after the 2nd vaccine patient got horrible cramps and it immediately bleed although it was not time for her period. She bled for 2 days then stopped. This month her period is so painful she thought her appendix ruptured. The pain was so intense it caused her to vomit. Patient's flow is incredibly heavy , thoroughly saturating a super plus tampon in an hour.
1270963	4/29/2021	MI	17	F	4/26/2021	4/28/2021	Severe abdominal cramping for 2 days and now menstrual cycle has started 10 days earlier than scheduled
1260739	4/26/2021		17	F	4/24/2021	4/26/2021	Cramping and menstrual spotting even though on birth control.
1259984	4/26/2021	AZ	17	F	4/19/2021	4/20/2021	Menstrual cycle abnormalities. Spotting/bleeding at abnormal times in cycle.
1251149	4/24/2021	CA	16	F	4/16/2021	4/22/2021	Last period was April 4-10. Vaccine received April 16. Period started April 22, two weeks early.
1241734	4/22/2021	WA	17	F	3/25/2021	3/26/2021	My daughter has an IUD and hasn't had her period in nine months. With the first vaccine, her period started the next day. With the second shot, the same thing happened, next day. Second dose was 4-15/21. We assumed these odd occurrence was totally unrelated, but we're seeing incidences of the same discussed online and felt we should report this.

<u>VAERS_ID</u>	<u>RECVD</u>	<u>STATE</u>	<u>AGE_YRS</u>	<u>SEX</u>	<u>VAX_DATE</u>	<u>ONSET_DATE</u>	<u>SYMPTOM_TEXT</u>
1243227	4/22/2021	KY	17	F	4/9/2021	4/13/2021	Patient began menstruation early despite being on BCP. Patient was due to start menstruating on 4/18/2021. However, the patient started cramping and menstruating on 4/13/2021. This has never happened to patient.
1243856	4/22/2021	OH	17	F	4/20/2021	4/22/2021	Left arm sore. Severe migraine headache with blurry vision in left eye(vision corrected later in the day) Onset of menstrual cycle with severe abdominal cramping , nausea, heavy bleeding and headache.
1243804	4/22/2021	OH	17	F	3/30/2021	3/31/2021	Left arm ache, sore with slight bruising. Headache and mild fever. Painful menstrual cycle with abdominal cramping and heavy bleeding with the cycle lasting for 6 days (more than normal).
1238955	4/21/2021	TN	16	F	3/23/2021	4/12/2021	Could be completely coincidental, but almost two weeks (4 days prior to her second vaccine) patient started her menstrual cycle for the 2nd time in less than a month. She has a very regular 28 day cycle and has never had this happen before.
1237743	4/21/2021	GA	16	F	4/20/2021	4/20/2021	Swollen face on left side and red bump on face Red rash on left arm site of injection Period went off prior to vaccine and now period has returned. This has never happened before.
1211344	4/14/2021	CA	17	F	4/12/2021	4/13/2021	Sore arm after shot. Fever, body aches same night into next day. (as expected) Breakthrough bleeding started 2nd night after shot with full blown period starting 3rd morning after shot. She is on the pill, did not miss a dose and has never had breakthrough bleeding. We are on day 3 so no known outcome resolution of bleeding.
1207782	4/14/2021	NJ	16	F	3/27/2021	3/29/2021	Patient got her period two days after the shot and very heavy. Her menstrual cycle is generally erratic and heavy, but this was more excessive and longer than usual.
1160382	4/2/2021	KS	16	F	2/19/2021	4/2/2021	Patient referred to clinic for increased bruising. Patient reports heavier menstrual flow, frequent bloody nose recently.

<i>VAERS_ID</i>	<i>RECVDATE</i>	<i>STATE</i>	<i>AGE_YRS</i>	<i>SEX</i>	<i>VAX_DATE</i>	<i>ONSET_DATE</i>	<i>SYMPTOM_TEXT</i>
1033449	2/16/2021	IL	17	F	2/12/2021	2/16/2021	Patients menstrual cycle started the day she received the moderna vaccine, the next day,02/13/2021, she stated it was heavier than she had ever had. Patient reported changing birth control 1-2 months previously. On 02/16/2021 Patient's father reported she was standing in the kitchen and her pupils were huge. Patient told parents she couldn't see or hear. Patient became unconscious for approximately 3 seconds. took patient to ER. ER was unable to find a cause. Loss of vision and hearing lasted approximately 3-5 minutes.
